

WEEE Compliance

This declaration is applicable to iBS0x sensor beacon, iGS0x beacon gateway, and other products supplied by Ingics Technology for compliance of WEEE Directive (2012/19/EU).

To meet the requirements of WEEE and to contribute to sustainable production and consumption, a crossed-out wheeled-bin symbol is marked on all our products as an indication that the products should not be treated as household waste. They have to be sent to the appropriate collection point for the recycling of electrical and electronic equipment in accordance with local environmental regulations for waste disposal.

Meanwhile, since our product is not sold directly to the end user and generally it is a part of the solution provided by our customer, the customer is recognized as a professional seller and has the responsibility to comply with the requirement of WEEE Directive too.

In order to help our customers to meet the requirement, we will provide the necessary reporting requirement(such as a WEEE compliant assessment report) to our customers for registering and communicating with the local authorities and recycling agency.
